Important Legal Notice:

The purpose of this handbook is to provide information regarding Traut Core Knowledge School as well as our school’s rules and procedures. Poudre School District policies and regulations (including but not limited to those in the District’s Student Rights & Code of Conduct booklet) also apply at Traut Core Knowledge School and are controlling over our rules and procedures if there is any inconsistency or conflict. Although this handbook may reference certain District policies and regulations, the actual language of the referenced policies and regulations is controlling over the language in this handbook.
Welcome to TCKS!

This guide is the product of much careful thought by the members of our Parent Education Committee. It has been prepared for you to ensure that the essential background knowledge that forms the foundation of this school becomes part of your understanding and purpose for continued leadership action. We often refer to this essential background knowledge as a “baton” which is passed from one generation of parents and staff members to another as each generation leaves and the next enters this school. We have a rich history of struggles and overcoming obstacles. Ours is an exciting story of what can happen in a school when leaders with vision and commitment join together to bring the vision into reality. This handbook contains key information for you to know, enjoy, and pass on.

Our school exists today because of a dream proposed by a grassroots parent effort in the early 1990’s, and because of the combined efforts of those parents to bring that dream to reality. The initial strong leadership provided by our founding parents helped to obtain the approval of the original proposal for this school by Poudre School District’s Board of Education in April, 1993. The vision, research, reading homework, determination, and tenacity of our founding families was essential, and provided the momentum necessary to open our school in the fall of 1993. Later generations of parents joined with and built upon the work of these founding families, creating the school we have today. As our staff members have joined this venture and committed themselves to our vision of “educational excellence in knowledge, skills, and character with strong parent-teacher-student partnerships,” the strength of leadership in the combined partnership has been superb. Now our current parents maintain our tradition of excellence and also improve and add strengths to our school for the future.

Traut Core Knowledge School has been consistently named a “John Irwin School of Excellence” by the Colorado Department of Education because of our students’ scores on their Colorado Student Assessment Program (CSAP) tests. The Character Education Partnership (CEP) also designated TCKS as a “National School of Character” in 1999, after CEP evaluated our Character Education program during an inspection visit to our site. Both of these designations are evidence of what is possible when parents, staff, and students work hard together to build a strong learning community based on sound educational concepts. We describe these concepts as the “Five Pillars” of our Core Knowledge curriculum: use of the Core Knowledge Sequence, parents as full partners in the education of their children, character education taught directly as an integrated part of the curriculum, students’ responsibility for their own learning, and the use of excellent literature to develop an enjoyment and skill in reading that we call “mature literacy.” To understand TCKS, you must understand our history and our five pillars. Providing that foundational knowledge is the primary purpose of this guide.
From Dream to Reality—
The History of Traut Core Knowledge School

In the spring of 1992, several groups of parents began meeting to discuss ways they could contribute to improving public education in Fort Collins. Discussion revolved around strategies for educational reform. These parents wanted higher academic standards, a different curriculum, and schools that taught and enforced the values of a democratic society. They believed that parental choice was fundamental to meeting the diverse needs of children and raising academic standards.

The outcome of these initial meetings was the drafting of a proposal for an elementary school of choice. The proposal included the key elements of a Core Knowledge curriculum as the educational fulcrum of the school. These elements also included phonics-based reading instruction, the development of mature literacy, character education, student responsibility for academic effort and behavior, and parental involvement at all levels of school operation. These concepts eventually evolved into the “Five Pillars” which form the foundation for Traut Core Knowledge School. The Elementary School of Choice Proposal (Original Proposal) may be found on the TCKS website under “TCKS Information”.

The original proposal for a new school of choice was presented to the Poudre School District Board of Education. After much discussion and several meetings, the Board of Education voted in April 1993 to approve the proposal, and to locate the new Core Knowledge School of Choice at the old Washington Elementary School site on Shields Street. According to Poudre School District policy, an educational program takes on the name of the building in which it is located, so the new school of choice became known as “Washington Core Knowledge School,” or WCKS. WCKS was approved for opening in the fall of 1993 with 125 students in grades K-4. WCKS was to be a “one-track” school, meaning there would be one class of 25 students in each grade level. The class lists were filled immediately and a waiting list was established. Still, there was much work to be done before school began.

Parent volunteers filled every committee to ensure that the school would be ready for the students. A Hiring Committee interviewed and recommended five teachers for selection by the PSD Board of Education, including the position of “Principal Teacher.” An office administrator was hired. Members of the Curriculum Committee researched and selected teaching materials that matched the content in the Core Knowledge Sequence. A Grants Committee began an ultimately successful search for funds from the Challenge Foundation and other supporters of alternative educational approaches.

A Library Committee stocked bare shelves with contributions from parents, businesses, public libraries, and sympathetic school librarians. Parents scrounged and bartered for tables, desks, chairs, typewriters, photocopiers, and pencil sharpeners. The Poudre School District contributed from already stretched resources. The Core Knowledge concept continued to receive wide community support.

Being a school of choice meant attracting students from throughout Fort Collins, Loveland, and Windsor. WCKS parents provided transportation for their students to and from school. A Transportation Committee organized carpools and established a network of neighborhood carpools that continue to this day.

During the 1994 – 95 school year, the growing community interest in the program prompted the Board of Education to approve the expansion of WCKS from 125 to 225 students. This allowed WCKS to expand into two classes for grades K-3, with one class each for grades 4-5. As more parents were attracted to a Core Knowledge education for their children, the waiting list continued to grow.

To help meet the increased demand for the program, the Board of Education approved a relocation proposal for the 1995-1996 school year, which allowed the Core Knowledge School to move into the historic Fort Collins High School on Remington Street. The high school had relocated to a newly constructed facility on Timberline Road, leaving the old three-story brick building empty. The facility needed significant work to prepare it for elementary students, and the WCKS community responded.

The Poudre School District hired contractors to do the necessary remodeling, and a small army of parent volunteers invested many hours of their time cleaning, painting, moving, and performing dozens of tasks that were necessary to make the facility work for younger children. With the move, the school population grew from 225 to 408 students, allowing three classes at each grade level K-3, two classes for 4-5, and one sixth grade class. Still, the waiting list grew. Some enterprising parents even tried to register their children before they were born.
As WCKS grew, it began getting national attention. The Core Knowledge Foundation invited WCKS to become one of six Core Knowledge schools in the nation to participate in a three-year study by Johns Hopkins University that evaluated the impact of the Core Knowledge curriculum on student learning. Two educational periodicals, Teacher Magazine (August 1996), and The American Educator (Winter 1996-1997), published articles featuring WCKS. Poudre School District officials were able to point to WCKS as an example of diversity in school choice within the district.

Washington Core Knowledge School was a success. It was stable and had become an established part of the Fort Collins educational landscape. In the winter of 1995, after a thorough performance review, the Board of Education approved the recommendation by PSD’s administration that WCKS be removed from its two-year “Pilot School” status, making it a permanent part of the Poudre School District. Despite this vote of confidence, more challenges lay ahead. Permanently housing WCKS in the old FCHS facility was not practical, especially after Poudre School District agreed to sell the building to Colorado State University. A new home for the school had to be located.

A second challenge during the 1996-1997 school year was the proposal by a number of parents to make WCKS a charter school. Several public meetings and numerous hallway and parking lot conversations were devoted to considering the pros and cons of “chartering” WCKS. Finally, it was time to vote. The parents’ vote was 77%, and the staff vote was 100%, in favor of remaining a “partnership school” within Poudre School District. While this vote settled the question of whether WCKS would become a charter school, the parents who wanted the charter continued to work to build support for a charter school. Eventually, they were able to obtain approval from the Board of Education for their proposal. This helped relieve the ever-growing waiting list by allowing more students to participate in the Core Knowledge program.

A number of options were proposed to resolve the issue of finding a permanent facility for WCKS. These proposals included splitting up the school to send WCKS’ students to other PSD schools with vacant classrooms; emptying out an existing school (Irish Elementary School) by busing their students to PSD schools with room for more students, and using the emptied building to house the Core Knowledge program; and constructing a new facility. When the Irish proposal was brought to the Board of Education by the PSD administration, the outcry by Irish parents was enough to convince the Board members to reject the administration’s proposal.

The Board of Education later appointed a task force to study the issue of where to locate WCKS. This task force met a number of times during the 1996-1997 school year, and found that the best option was to build a new facility to house the Core Knowledge program. After comparing two separate possible locations (on Vine Drive and near Preston JHS), the Board approved the location adjacent to the new Preston Junior High School in southeast Fort Collins. Construction began in November 1997. The school was named “Traut Elementary School” in honor of two sisters, Evelyn and Lena Traut, who taught in Poudre School District for a combined total of 82 years.

The new building was completed in December 1998. The week before Christmas break was dedicated to moving WCKS from the old FCHS location to the new Traut Elementary School. The move was planned and directed by two parent partners and went well. The school thus became “Traut Core Knowledge School (TCKS).”

As TCKS, our school has continued its quest for “educational excellence in knowledge, skills and character with strong parent-teacher-student partnerships,” and has been consistently named by the Colorado Department of Education as a John Irwin School of Excellence. Like America, the ideas behind Traut Core Knowledge School were revolutionary at the time. As the dream for this school became reality, the foundational concepts on which it is based have spread. We are thrilled that other schools have adopted the Core Knowledge curriculum and character education concepts.

Dr. E.D. Hirsch, Jr. summarized our experience in his book, The Schools We Need and Why We Don't Have Them, in these words: “The dramatic and happily ending story of the Fort Collins school deserves to be memorialized to inspire others.” Traut Core Knowledge School will thrive as long as committed parents, staff, and school administrators are prepared to stand up in passionate support for the founding concepts now preserved in our Covenant, including the value of a strong public school of choice as a permanent part of Poudre School District. We are committed to “sharing the knowledge” of what works to best help our students learn and grow—and we continually learn from others what works for their students. Through this continuous improvement process we can develop strong learning communities and maintain our rich tradition of excellence.
OUR FIVE PILLARS

1. Core Knowledge—The Central Pillar

Children need a solid foundation of knowledge in order to understand and make sense of their world, to develop mature literacy, and to be able to think critically. They will build further knowledge on this foundation as they continue to grow and learn.

This school will use the Core Knowledge Sequence for kindergarten through 6th grade.
- TCKS Covenant

The Philosophy of Core Knowledge

The idea that there is a common core of knowledge that all people in a society should possess in order to understand that society and each other was advocated in the 1987 book *Cultural Literacy: What Every American Needs to Know*, by E.D. Hirsch, Jr., PhD. Dr. Hirsch argued that schools should teach a common core of knowledge to establish greater fairness, academic excellence, and higher literacy. Dr. Hirsch’s ideas resulted in a school reform movement and the founding of the Core Knowledge Foundation. The Foundation developed the Core Knowledge Sequence in collaboration with teachers, parents, scientists, professional curriculum organizations, experts in all major disciplines, and an advisory board on multicultural traditions. The sequence is also the result of research into the content and structure of the world’s highest performing school systems. The Sequence has been revised several times based on the direct responses of teachers using it. The Sequence specifies the core of knowledge needed to become a literate member of a national and world society.

The first Core Knowledge school opened for the 1990-1991 school year. Our school was opened for the 1993-1994 school year; the first Core Knowledge school in Colorado and among the first 40 schools nationwide. Suggestions and the record of experience of this school have been used to improve the Core Knowledge Sequence. TCKS is accredited as an Official Core Knowledge School because we actively commit to teach all of the Core Knowledge Sequence.

In 1997 E.D. Hirsch, Jr. published *The Schools We Need: And Why We Don’t Have Them*. This book considerably buttresses and amplifies the arguments of *Cultural Literacy* and, in addition, demonstrates that a solid factual curriculum is not only essential to society, but also is the best way to learn the skills needed for more learning. Hirsch’s latest books, *The Schools We Need* and *The Making of Americans* are essential books for the understanding of the necessity for, and the power of, the Core Knowledge Sequence.

Another recent book on Core Knowledge is *The Knowledge Deficit* by E.D. Hirsch, published in 2006. This book covers the most recent research and arguments in support of a Core Knowledge curriculum.

What is Core Knowledge?

Technically, it is an exact content and sequence for the subjects of language arts, history, geography, mathematics, science, and fine arts. The curriculum is specified in the book, *Core Knowledge Sequence*, available in the TCKS library. The Sequence designates both what is to be taught (the scope of knowledge) and the grade levels in which the knowledge will be taught (the sequence of learning). The content is described in greater detail in the *What Your Kindergartner – Fifth Grader Needs to Know* series. These books are also available in the TCKS library.

More broadly, Core Knowledge has been described in terms of the Four S’s of Core Knowledge: shared knowledge, solid knowledge, sequenced knowledge, and specific knowledge. These concepts must be present in any curriculum that is both excellent and fair because we must possess shared background knowledge in order to understand each other and our culture. The Four S’s are the basis of the Core Knowledge Sequence.
Shared knowledge is a body of knowledge that all children should be taught and that all adults should possess. In order to understand politics, scientific developments and debates, history and current events, and our fellow citizens, we must all know something about the same things. We must be literate in the culture of our nation and world. Core Knowledge provides this shared knowledge to our children.

Solid knowledge is knowledge that literate people have possessed in the past, possess today, and will need to possess in the future. Today, many say that all knowledge becomes rapidly outmoded. This may be true for some specific fields, but it is not true for the basic facts needed to understand our society. The fundamentals of history, literature, geography, mathematics, science, and the arts do not change rapidly. In addition, a background in these areas is necessary to understand the changes that do take place over time—and in our time. The Core Knowledge Sequence gives our children this knowledge.

Providing for sequenced knowledge acquisition is essential.

- First, it ensures that all children advance during each school year and in grade level with the necessary knowledge and skills in order to succeed at the next level. Since we know what each child must learn at a given grade level, we can ensure that the material is learned. Without a specified sequence, however, children advance in grade having learned different things in prior years. Presented with children having different levels of knowledge, each grade level teacher must rush through a review of basic facts of each subject. This review may bore those students who know the basic facts and bewilder those who don’t. In addition, gaps in students’ knowledge develop when some subjects are over-emphasized while others get short shrift or are skipped altogether. Each child leaving any one of our three classes per grade will have the same core of knowledge and be prepared to move on with this knowledge to the next grade.

- Second, children learn new knowledge by building on what they already know. Learning some concepts first allows other concepts to be more effectively learned later. The earlier knowledge is built upon but not repeated. This is referred to as spiraling.

- Third, content in different subjects can be integrated so that the material in each subject reinforces the others. For example, the areas studied in history, geography, literature, art, and music can all relate to the same subject and mutually reinforce the child’s learning of each subject. The Core Knowledge Sequence provides a guide to knowledge acquisition by precisely describing what knowledge is learned and when.

The specific knowledge to be learned must be described by the curriculum. The basic fields of human knowledge are too broad for the selection of their essential elements to be left to chance or to the individual teacher. In order for the selected essentials of a subject to be both sufficient for cultural literacy and also to be of a manageable amount, an overall guideline of knowledge must be provided. This list of specific knowledge was developed by the Core Knowledge Foundation by a long process of research and consensus building. The resulting Core Knowledge Sequence provides our children the knowledge they need and gives them the ability to learn it.

Our curriculum describes the broad knowledge all literate people need to know. This scope is a specific and comprehensive foundation of material. It is not a list of facts to be memorized, but, rather is a list of material to study and understand. Once the material is mastered (through eighth grade), the student will be able to focus on specific areas for more in-depth study. The material is not an elitist, “back to the basics,” euro-centric, or nationalistic curriculum supposed to have existed in the past. It is not the curriculum we had in school as children. The scope of the sequence is intended to give our children the facts and the methods needed to think—not what to think.

Other Benefits of Core Knowledge

Core Knowledge works:

Studies have shown that a Core Knowledge curriculum works. TCKS was a participant in a large study conducted by Johns Hopkins University in the
1990’s. The effectiveness of Core Knowledge has been more recently studied by researchers at the University of Missouri. Both studies have shown that the Core Knowledge curriculum works better than other curriculum options. Both studies are referenced in the resources section at the conclusion of this pillar.

Core Knowledge gives our children “intellectual capital”:
Because of the disciplined scope and sequence, our children just learn more. This base of knowledge has been described as “intellectual capital” by E.D. Hirsch. Just as we all build our own skills upon what we already know, “those children who possess intellectual capital...have the mental scaffolding and Velcro to catch hold of what is going on, and they can turn that knowledge into still more mental Velcro to gain still more knowledge.” - The Schools We Need

Core Knowledge gives our children the skills they need:
Core Knowledge is far more than a store of useful facts to be absorbed. Indeed, together with all parents and educators we wish,
...to produce students with “higher order skills” who are able to think independently about the unfamiliar problems they will encounter in the “information age,” who have become “problem solvers” and have “learned how to learn,” and who are on their way to becoming “critical thinkers” and “lifelong learners.” -The Schools We Need

Where Core Knowledge parts company with standard educational theory is that we do not believe these skills can be learned without a broad grounding in facts and information. Problem solving skills depend on communication and learning skills, which in turn depend upon a broad vocabulary. So-called “thinking skills” are not general skills, but rather are specific methods which are gradually developed within a subject. For example, methods and ways of thinking used for solving mathematical problems are not generally transferable to history essay questions. Instead of focusing on general thinking skills, we focus on the subject and the thinking skills necessary for that subject. We do not believe that there can be “critical thinking” about a subject without knowing a lot about that subject and related subjects, and having the ability to learn and understand more.

In the end neither fact-filled memorization nor large conceptual generalizations are effective modes of education for higher order thinking. Teaching a generous number of carefully chosen exemplary facts within a meaningful explanatory context is a better method for inducing insightful thinking. The best tool for higher order thinking is intellectual capital—to know a lot of facts and subject specific procedures and strategies for dealing with facts.

- The Schools We Need

Children like Core Knowledge:
Children are full of questions about how things work and what happened in the past. Core Knowledge answers these questions! Core Knowledge is also full of stories which have proven to be interesting to children over many years. Core Knowledge avoids the boredom of repeating a subject and also the isolation of being completely at sea in a subject the rest of the class already seems to know about. Core Knowledge encourages mature literacy—one of the great joys of life. In Core Knowledge, children who are gifted in a specific subject can learn more about that subject—not some other subject different than their peers. Our Core Knowledge curriculum creates real confidence in our children: confidence in their current knowledge and confidence that they can learn more.

Our teachers benefit from Core Knowledge:
One common misperception about the Core Knowledge curriculum is that it demands the rote memorization of facts or a specific “old-fashioned” teaching method. In fact, the Core Knowledge Sequence and Foundation do not specify a teaching method. Any visit to our classrooms immediately dispels the idea that Core Knowledge is rote or boring learning. Rather, free teachers from the work of deciding what to teach allows them to spend more time on the innovative and professionally demanding work of determining how to teach the curriculum—in general, to a specific class, and to a specific student. Teachers are masters of what they teach, but their professional training and expertise is in how to teach a subject to children. Our specific scope and sequence allows them to fully use this expertise. The Core Knowledge curriculum also promotes collegiality among teachers. Because all teachers in each grade are teaching the same things, they can work together. Because each grade builds upon the previous grades, there is communication between the grade levels. In addition, art and music education are integrated with the classroom instruction. Academic studies have shown an increased level of job satisfaction among teachers in a Core Knowledge school.
Core Knowledge is fair:

One constant in educational statistics is that the intellectual quality of a student’s home is directly related to how that student does in school. This is largely because students get varying amounts of background knowledge they need at home. In a Core Knowledge school, all students learn the background knowledge they need and are thus prepared to move on to more knowledge. The expectations at our school are based on what is learned in the school curriculum— not on family background. As a result, all students are ready to move forward as one. Students are not bewildered by being expected to know what they have not been taught, nor are they held back while basic concepts are reviewed for others.

Core Knowledge provides a clear outline of what our children are learning:

As parents, this allows us to understand what our children are learning and when they will learn it. Each grade level has a defined sequence of material that is sent home at the beginning of each year. In addition, we can look ahead in the Core Knowledge Sequence and know what subjects our children will be covering in later years. We can select outside reading materials or even plan trips or vacations based partly on our children’s curriculum. Knowing what our children are learning enlivens our conversations with them. We have confidence that our children are learning what they need to know.

Other Learning Opportunities at Traut

Physical education:

Although physical education is not in the Core Knowledge Sequence, we believe it is an integral part of a child’s total education. Our physical education program is, like the Core Knowledge Sequence, designed to be solid, sequenced, specific, and integrated with the remainder of the school curriculum. Our program seeks to develop physical and motor skills as well as habits for life-long physical fitness. In addition, many of our Character Qualities can be and are very effectively taught in the physical education setting.

Extra-Curricular Activities

Extra-curricular music opportunities:

There are two opportunities for music outside regular school hours. The Music from the Core Choir is led by our Music Teacher and is available to students in 3rd through 5th Grade. It is a non-select (no auditions are necessary) choir that meets in the morning, two times per week during the school year. In addition, the TCKS Bell Choir is comprised of 3rd through 5th grade students and meets once per week after school. The Bell Choir is also non-select.

Extra-curricular art opportunities:

Each year, student art is selected for display at the District Art Show. Our Art Teacher is responsible for the selection and presentation of the works. Parent participation is always welcome and encouraged.

Science Fair:

This is a required activity for grades 4 – 5, but younger students may participate if they wish. For more information see the Science Fair Guidelines available on the TCKS website.

Additional academic support:

Students are assessed to evaluate their current math and literacy levels and content retention. If necessary, more assessments may be administered, and students who require additional support are identified and supported appropriately.

Currently, ALPs (Advanced Learning Plans) are provided for advanced students in Math and Language Arts as decided by the Gifted and Talented Coordinator, the classroom teachers, and the principal. Teachers also ensure that all students are suitably challenged within the classroom setting. If you feel that your child requires additional support, please contact her or his teacher directly.
Extra-curricular Physical Education opportunities:

Various after school activities in physical education are offered, the nature of which depends on student interest and involvement. Check the current Physical Education Handbook. In addition, various fun run activities such as the annual Pumpkin Run and the Traut Track Ten are held. Parent participation is encouraged and necessary to organize and run these fun events.

What about soccer, basketball, baseball and other competitive sports?

Various organized sports opportunities are available to our students through the City of Fort Collins, the City of Loveland, the Town of Windsor, and various private companies and clubs. More information is available on the web at www.fortnet.org.

Lego Robotics

Lego Robotics is a team oriented problem-solving program for fourth through fifth graders that encourages critical thinking and creative problem solving. Teams are established by age level and problems vary each year. Teams are parent-coached. For more information, see the contact information in the TCKS Directory.

Foreign language at TCKS:

Classes are currently offered in Spanish and Chinese. This is a volunteer parent run program with paid teachers. For further information see the Foreign Language Program bulletin board outside the School Lounge.

Girl and Boy Scouts:

TCKS has active Girl Scout and Boy Scout organizations. Information is available at the beginning of each school year and also at the Main Office.

Chess Club

For more information, see the contact information in the TCKS Directory.

Other Extra Curricular Activities

For more information, see the TCKS website.

II. Parent Partnership—You make it happen!

Above all we recognize that parents are the child’s first and most important teachers. At Traut Core Knowledge School, parents will be in full partnership with the staff in all aspects of the school ensuring the most effective education possible for their children. This partnership includes the responsibility to support the school staff and provide good examples of behavior and work habits for their children.

- TCKS Covenant

Parent Partnership is Essential to TCKS

Parents founded this school, were intimately involved in all aspects of starting the school, and have been and are integral to all aspects of our school’s day-to-day operation and long-term policy. At Traut this is our privilege, our right, and our duty. In fact, the role of parents is so important to the overall success of our students that we have included a number of specific statements in our Covenant to preserve and clarify our beliefs on the importance of that parental role. These statements include:

1. Parental partnerships with teachers in and out of the classroom are essential in providing our children with the attention they need and deserve.

2. Traut Core Knowledge School is characterized as a School of Choice. This means that parents have options, and can select an educational philosophy for their children. Given a choice in public education, we believe parents will play a stronger role in our schools.

3. The family provides the most influential and effective context for basic life-long learning and teaching. While relying on the training and expertise of the professional staff, the fundamental significance of the parent-child relationship to the educational process must be maintained and fostered. All parents of the school shall have a voice in the decisions made that affect their own children.

4. Parents will be invited to teach or assist with lesson plans or learning projects in all subjects depending on their interests and expertise. Parents will also be encouraged to spend time reading aloud to children at school, coaching them in skill development, and otherwise contributing time and talents in a variety of ways at the school and on committees.

5. As partners in education, parents are expected to understand our school’s philosophy and are strongly encouraged to become informed about educational issues.

To maintain our stated goal of educational excellence for each of our students, all parent partners must give their support. Children learn to value what we value— and the participation of their parents at school or home sends a strong message that school and learning are important. Our students are listening and watching— and they are benefiting greatly.

How do we fulfill our roles as parent partners?

We work directly with our children:

• In the classroom: Parent Partners are needed in the classroom to assist with small group activities, games, and individual practice to reinforce and extend skills in reading, writing, and math. A parent is also needed in most classrooms on Fridays to file newsletters and completed assignments into envelopes, which are taken home by students. There are classroom volunteer opportunities for parents who cannot be in school during the day. Parent volunteers often take home papers to grade, complete preparations for class projects, and donate supplies for parties and classrooms. There are also opportunities available for those who cannot commit to a regular schedule, but wish to have “hands on” experience in the classroom. These include being on the classroom volunteer substitute list and helping with field trips and special projects.
• During Specials: In our Art Program, parents help students during their art classroom time, mat and display student artwork, and with the set-up and breakdown of displays throughout the year. Our Music Program requires parent support during classroom time, with concerts and plays in the winter and spring, and with the choirs. Parents are needed in our Physical Education Program during class time and with special events such as Jump Rope for Heart and Field Day.

• Parents assist the Librarian and Media Specialist by checking books in and out, shelving materials, and reading with students. Parent volunteers are also welcome in the computer lab during scheduled class time.

• How to find volunteer opportunities: Each teacher has a classroom coordinator. The classroom coordinator assists the teacher in recruiting and coordinating classroom volunteers. Classroom volunteer sign-up sheets are available in each classroom at both the Ice Cream Social and Back to School Night. Sign up sheets are also posted outside the music and art rooms and the gym. You may call a specific teacher’s classroom coordinator to inquire about volunteer opportunities. In addition, the media center (library and computer lab), Main Office, math and literacy programs, and enrichment programs all need volunteers. To inquire about these programs, call the contact person listed in the school directory. In addition, many volunteers are needed for after school clubs and activities.

• Safety and security: To ensure the safety and security of our students, parents and staff, all volunteers and visitors to the school are required to wear a name badge while in the building. All volunteers are screened by the PSD. In addition, volunteers must sign in and out on the in/out log sheet in the office. Other visitors must also check in and out at the Main Office.

• Siblings in the classroom: With teacher approval, younger siblings may be brought into school while the parent is volunteering to help in the classroom, to a class party, or on a class field trip. They must be closely supervised by their parent to ensure that they do not disrupt the learning environment, damage school materials or equipment, and that they remain safe. If either the parent or the teacher has a concern about the appropriateness of younger siblings coming to school or their behavior, it will be her or his responsibility to talk directly to the other to clarify that concern. For more information please see the policy for Younger Siblings in Classroom available in the Policy Manual available in the Parents’ Resources section of the TCKS library and on the TCKS web site.

• We are our children’s first and most important teachers: At all times we can serve as good parents and examples for our children. We not only encourage them to read, we set an example and read ourselves; we not only encourage them to do their homework, we keep ourselves aware of educational issues; we not only limit their television watching, we limit our own. We model the Character Qualities every day. Our Parent Partnership pillar means we are not passively watching our children grow, but actively growing with them.

We serve on committees:

Eleven permanent committees have been established to support the Site Based Management Council (SBMC) and carry out much of the work of operating our school. Various ad-hoc committees are established as needed to work on special projects. If you have an interest in the subject of one of our committees, call the chairperson for more information. A list of standing and ad hoc committees and their chairpersons is in the school directory. The eleven permanent committees and their missions are:

ASSESSMENT: Evaluate student and overall school progress toward established standards and goals.

CURRICULUM: Evaluate and recommend materials to ensure the best possible delivery of curriculum.
COMMUNICATIONS: Promote a positive image of our school in the community and encourage our city to support choice in education. Facilitate clear channels of communication between staff and parents.

CHARACTER EDUCATION: Educate, motivate and help implement the development of our Character Education Pillar in all aspects of life at our school.

FUND RAISING: Raise additional funds for TCKS. Funds are used to supplement district support and provide enrichment activities to TCKS.

GRANTS: Generate funding in the form of cash grants and grants in kind from external sources.

HIRING: Hire the best available staff for TCKS. This committee is composed of the principal and an equal number of staff members and parents. Committee members are encouraged to serve more than one year.

TECHNOLOGY: Successfully incorporate technology into the TCKS curriculum, including support of the staff and parent community.

LIBRARY: Teach information skills and provide materials and services that support the instructional program, as well as literature for recreational reading.

PARENT EDUCATION: Keep parents informed about educational issues, especially those related to the five guiding principles defined in the TCKS School Covenant.

PARTNERSHIP AND VOLUNTEER PROGRAM (formerly VIPs): Oversee in-class volunteer efforts by parents.

We serve on the Site Based Management Committee (SBMC):

Parents participate in the governance of TCKS through the election of seven parent representatives to the Parent Advisory Board (PAB). They serve as advocates for parents and students regarding school policies and issues. Six staff members are elected by the school staff to serve along with the principal on the Teacher Advisory Board (TAB), and, together with the PAB, make up the governing body of the school known as the Site Based Management Committee (SBMC). The SBMC is the primary policy-making body at TCKS. It sets the school’s goals, improvement strategies, and makes all major site policies. Any authority not mandated by statute or State or District policy either resides with the SBMC or is delegated by the SBMC.

Please refer to the Charter for more information on this important role parents provide. All parents are welcome to attend the meetings of the SBMC, the dates of which are posted in the Friday Notes. A portion of each meeting is designated for community comment. For more information see the TCKS Charter in this binder and the policy for Obtaining Community Input at SBMC Meetings available on the TCKS website or in the Policy Manual available in the Parents’ Resources section of the TCKS library.

How can I make suggestions or seek changes? There are many avenues for parent input. Informally; every parent is encouraged to maintain contact with classroom teachers, the principal, and other school staff to discuss concerns, ideas, and compliments. Parents may also contact a committee member or PAB representative with ideas or issues. A formal conflict resolution process is also available and is described in the TCKS Hand-In-Hand Guidebook of School Partnerships in this binder.

More information: The TCKS Hand-In-Hand Guidebook of School Partnerships specifies how our partnership works. The key concept in the Handbook is that a combination of common mission, respect, communication, and shared responsibility is essential to achieve the trust that is necessary for a successful partnership.
III. Character Education—Every Day in Every Way

The family bears the key responsibility for character instruction.

The staff of our school will teach, reinforce, and support the character qualities through the content of the Core Knowledge Sequence. All adults in this school community are expected to model our twelve character qualities, and to hold children accountable for exhibiting these qualities.

- TCKS Covenant

Our Twelve Character Qualities: Our character education pillar is made specific by the twelve Character Qualities. Rather than having a long list of rules for students to unthinkingly obey, we have a list of general qualities. The reason for having general qualities rather than specific rules is to allow the students to cooperatively participate in their own character development rather than just following rules imposed on them. Our twelve Character Qualities are:

- Respect
- Responsibility
- Citizenship
- Self-control
- Honesty
- Patience
- Kindness
- Humility
- Integrity
- Perseverance
- Cooperation
- Appreciation of individual strengths and cultural backgrounds

Why do we teach character education?

The original proposal for this school included as a declaration of principle the intent to teach the values of a democratic society as an integral part of the educational program. We have named this teaching process “character education.” We believe the teaching of character is important because it will affect our students and our society throughout their lives. Teaching a child the rules of what is right and wrong is easy. We want more than

this—we want our children to know what is right and to have the moral judgment and maturity to do what is right. These Character Qualities are the foundation of our standards of behavior and for how we get along with each other.

How we teach the Character Qualities:

The Core Knowledge curriculum is the primary means through which our students are taught the twelve Character Qualities. Each teacher teaches all of the Character Qualities each year. Teachers use the content of the Core Knowledge curriculum to develop brief mini-lessons that emphasize specific Character Qualities as opportunities occur naturally in the curriculum material being studied. The intent is for our students to receive direct instruction on each of the Character Qualities every year. By the time our students complete fifth grade, they will have studied each character quality at least seven times—using different literature and curriculum materials each year. “Teachable moments” in literature, history, and across the curriculum are taken advantage of as ways to promote understanding and inspire development of good character.

In our building, you will not observe a character education program per se. Instead character education is an operating philosophy and point of view that influences all the decisions of the school. It is an ongoing teaching objective throughout the day.

Character doesn’t function in a vacuum—it functions in a social environment. The twelve Character Qualities at Traut Core Knowledge School are abstract ideas that can only be expressed in the context of human beings and how they think, feel and behave. In a caring and moral school climate, students are socially secure, physically safe, emotionally loved, and mentally challenged. Every interaction with teachers, peers, staff and other parents provides opportunities to show and develop character qualities.

How can parents directly review the Character Qualities and expected behavior with their children?

The TCKS Door-To-Door Handbook of Character Education at Work is a comprehensive list of desired student behavior based on the twelve Character Qualities. The Character Education Committee has also developed a Character Based Bullying Prevention and Education Program. The Door-To-Door Handbook and the Bullying Prevention Program are included in this notebook.
Our character education program works:

Our character standards help us establish clear guidelines for appropriate behavior in our school. Our Character Qualities form the foundation for classroom management systems and for our school’s standards of conduct. The results are fewer major disruptions in school, and greater student interest and focus in class. When students and adult partners exhibit good character, teachers can teach, and students can learn. In 1999 TCKS was evaluated and named as one of ten National Schools of Character by the Character Education Partnership.

IV. Student Responsibility—Words, Actions and Learning

All students are capable of learning to accept responsibility for their own education. We will encourage and help our students develop a desire for excellence and the discipline to achieve that excellence through the habits of thoroughness, diligence and perseverance.

-TCKS Covenant

The definition we use at TCKS for the character quality of Responsibility is, “Being in charge of what you say and do, accepting the consequences of your actions, and being accountable for your own learning.” When we apply this definition to our fourth pillar of Student Responsibility, it simply means that our students are responsible for their words, actions, and learning.

Our three-way partnership:

Our school’s vision is “educational excellence in knowledge, skills and character with strong parent-teacher-student partnerships.” Achieving this vision requires much work from all three groups in the partnership.

1. Our parents work hard in providing transportation to and from school each day, helping students with their homework, and volunteering in the school on a regular basis to help the teachers plan and deliver excellence in the curriculum.
2. Our teachers work hard to plan, deliver, and assess instruction from the Core Knowledge Sequence.
3. Our students behave appropriately and complete their work, both in the classroom and at home. In our three-way partnership of parents, teachers, and students, our students are the critically important component. Unless they understand and accept their responsibility for achieving educational excellence in knowledge, skills, and character, the benefit of all of the hard work done by their teachers and parents is lost.
Our students are responsible:

We see this every day in our students’ knowledge and actions. In addition, our students are among the highest performing children in our district and state. Traut has been consistently named a John Irwin School of Excellence. This award was created by the State of Colorado to recognize those schools whose students perform in the top 8% academically.

High scores on standardized tests are important and are some indication of the success of our academic program and our students’ efforts. However, these tests are only a small part of what we do and what we hope our students achieve. The real indication of success is our children themselves unlocking the wonders of our world and growing in knowledge and character every day. The combined efforts of our partnership of parents, teachers, and students earn these distinctions. It is the positive effect of those efforts that allow us to remain a school of excellence, and to continue our growth in knowledge, skills, and character. We are counting on our students’ willingness to grow in accepting full responsibility for their words, actions, and learning in order to experience all of the benefits available to them as educated, mature, and literate members of society.

How much homework are our children expected to do?

The amount of homework assigned varies with each grade level. The goal, on average, is 10-15 minutes multiplied by the grade level. You may expect:

- K-1st: 10-15 minutes per night
- 2nd: 20-30 minutes per night
- 3rd: 30-45 minutes per night
- 4th: 40-60 minutes per night
- 5th: 50-75 minutes per night

assigned over a long period of time. In addition to the assigned homework, students with incomplete class work should expect to spend time at home completing this work. Homework will be assigned in such a way that students and parents expect homework regularly and in amounts that can be accomplished by dedicated efforts in a reasonable time frame. For more information see the Homework Policy available on the TCKS website and in the Policy Manual available in the Parents’ Resources section of the TCKS library.

How are students evaluated?
The following three evaluation categories are used:

1. MPR Model: The MPR model uses the letter grades: M (Most of the time), P (Part of the time) and R (Rarely) with respect to the categories or subject. The letter grades may be augmented with a plus (+) or a minus (-) to reflect further gradations. This scale is used to assess emotional and social growth, work skills, and effort.

2. 1234 Model: The 1234 Model uses the number grades: 1 (Has Not Demonstrated- Student has not demonstrated the skill and knowledge), 2 (Basic- Student has demonstrated partial proficiency in the skill and knowledge), 3 (Proficient- Student has demonstrated the skill and knowledge), and 4 (Advanced- Student has demonstrated the skill and knowledge far over expectations). This scale is used to assess all art, music, and physical education skills as well as kindergarten through second grade academic achievement skills.

3. ABCDF Model: The ABCDF model corresponds to demonstrated mastery of the percentage of the subject, as presented by the teacher, and will use the letter grades: A (90-100%), B (80-89%), C (70-79%), D (60-69%) and F (less than 60%). The letter grades may be augmented with a plus (+) or a minus (-) to reflect further gradations. This scale is used to assess third grade through fifth grade academic achievement skills.

For more information see the Grading Policy available on the TCKS website and in the Policy Manual available in the Parents’ Resources section of the TCKS library.
What if students are not fulfilling their responsibilities?

TCKS has a detention policy. Detention is generally in the form of a missed recess. The teacher assigning the detention usually assumes the responsibility for supervising the student during that time, although detention may also be coordinated with the lunchroom or playground supervisor.

For more information see the Study Hall Policy available on the TCKS website.

Are there student government opportunities at TCKS?

Our Student Advisory Board (SAB) is comprised of upper grade students, with the guidance of a teacher and parent partners. The Teacher Advisor is listed in the TCKS Directory.

V. Mature Literacy—Learning to Read, Reading to Learn, and Loving to Read

The skills of learning are best taught through the content of the body of organized knowledge. The development of literacy will be one of the main focuses of our school. Literacy instruction is based upon the premise that students need a strong foundation of systematic phonics instruction along with plentiful opportunities to read meaningful text in order to become mature, competent readers.

-TCKS Covenant

Reading is the most important skill for elementary students to learn:

Because of this, the development of literacy is a primary focus of Traut Core Knowledge School. Literacy skills begin with teaching our students how to read (“primary literacy”). Our fundamental approach to achieving this primary literacy is through a phonics-based program. Primary literacy development is especially focused in the kindergarten through second grade years. During grades 3 – 5, the need for direct phonics instruction decreases. As our students continue to progress in literacy from grades 3 to 5, the term “mature literacy” is used to describe their more advanced skills of reading to learn and reading for pleasure. It is also our goal to develop in each of our students a love for good literature. This is accomplished through immersion in excellent contemporary and classical literature, both in the classroom and recreationally.

Mature literacy also includes writing, listening, and speaking:

Writing style consists of two main types: Expository writing (explaining a subject) and narrative writing (telling a story). Expository writing instruction at Traut is based on the ideas contained in Alice Greiner’s Step Up to Writing Program and her teacher training programs and the 6 Trait Writing method. Narrative writing is taught using the techniques of Barbara Mariconda’s
Empowering Writers: Narrative Writing Workshop.
For more information on the TCK5 writing program
speak with your child’s teacher and consult the
resource list below.

Core Knowledge and Mature Literacy: The
certainty of core knowledge and mature literacy are
closely intertwined. Each is an integral part of the
other. Mature literacy cannot exist without the
facts and concepts of Core Knowledge because
these facts and concepts are essential to a true
understanding of what is read. Core Knowledge
cannot exist without mature literacy, because an
understanding of what is read and how that new
information fits with prior information is essential
to the knowledge building process of the Core
Knowledge Sequence. Because of this, literacy
instruction at TCK5 is deliberately designed to be
highly integrated with the Core Knowledge
Sequence. Materials chosen for literacy
development also teach the specific Core
Knowledge Sequence information being taught.
Materials chosen to teach the Core Knowledge
Sequence are chosen to also promote the
development of mature literacy. The Core
Knowledge Language Arts Sequence
provides the majority of selections
for literacy instruction in grades 3 –
5.

Our students meet Core
Knowledge, PSD, and State of Colorado
Standards:

Our teachers use the content of the Core
Knowledge Sequence to teach these literacy skills,
and to help our students achieve the Poudre School
District (PSD) and State of Colorado standards
for reading, writing, listening, and speaking. A
description of the reading, writing, listening, and
speaking standards is available in the publication
Teacher’s Guide to Standards in the PSD available
in the Main Office.

Literacy is assessed in a number of ways
at Traut:

First, classroom teachers and the
Literacy Team observe and assess reading and
writing ability in almost every interaction with
each child. Second, more formal assessment
tests also measure literacy development and
ability. Within the school, children in grades 1 - 5
are assessed every year. Within the District,
levels assessments are used in grades 2 - 5 to
measure student achievement against the PSD
standards. Within the State of Colorado, students
in grades 3 - 5 take the Colorado Student
Assessment Program (CSAP), which measures

student achievement against State of Colorado
standards. More information on the CSAP is available
at the Colorado Department of Education web site:
www.state.co.us/schools.

The results of these assessments,
together with information from prior teachers,
parents, and prior assessment information, are
used to evaluate each student’s reading level.
If a child is having difficulty with literacy
development, the TCK5 Literacy Team offers services
to students who require extra support in their reading
and writing skills. If you have concerns regarding your
child’s literacy development speak to his or her
classroom teacher who can arrange additional services
if necessary.

What can parents do to teach primary and
mature literacy?

First, we can support the direct instruction in
the classroom. This starts in the early grades with
reviewing the phonics sounds, sight words, easy
readers, and early chapter books. The teaching we do
does not end at the beginning of mature literacy, but
continues with reading to your mature reader and
having him or her read to you, discussing books, and
guiding your child to appropriate choices. We should
challenge our children to read some books at or a little
beyond their current reading level so that their
reading ability improves.

The second role we have as
“our children’s first and most
important teachers,” is to teach
our children to love to read. A
school can teach our children how to
read, but it cannot teach a love of
reading—only we can do this. As
children do more reading, the more they will yearn
to find meaning and gain knowledge in what they are
reading. This is true mature literacy. We can achieve
this by creating an environment friendly to reading in
our personal lives and our homes. Although
we may state, “Do as I say, not as I do,”
the reality is that our children will not
become mature life-long readers if they do
not see us reading. In addition, as our
covention states, excessive television
watching takes time away from more
valuable activities and total media time
should be restricted to no more than ten
hours per week.

What should my child read?

Our own judgment along with the following
resources can help us select excellent
books for our children. In addition,
some of the outside reading a child
does should match the subject matter currently being studied in class. This has four benefits. First, outside reading can solidify the child’s knowledge of the subject. Second, the base of knowledge learned in class can be built upon as the child learns more about the subject. Third, outside reading can make the child more interested and engaged in the class discussion. Finally, “reluctant readers” are given an entry point into reading by reading about something they know about and that interests them.

Mature literacy is vital to the future success and happiness of our children. By focusing so strongly on mature literacy, we are acting to give our children a bright future.

Most of the above books are available in the Parent Resources section of the TCKS library.

Administrative Matters—How, What, and Where

ADMISSION/Leaves of Absence

Enrollment is decided in accordance with PSD’s JFBA—Choice/Open Enrollment Policy. A student may be allowed to leave the school and later return in accordance with the policy for Student Leave of Absence. For more information see this policy available on the TCKS website and in the Policy Manual available in the Parents’ Resources section of the TCKS library.

ASSESSMENT

Each year the Assessment Committee evaluates the students’ performance. This is done using several approaches, which include comparison of absolute student achievement to national norms, measuring TCKS student progress toward state standards, and comparison of student growth to national norms. A report is distributed to parents once a year.

BASE CAMP

Base Camp is a non-profit organization that contracts with the Poudre School District to provide before and after school care. Traut does have a Base Camp program available with before school hours of 6:30 to 8:30 a.m. and after school hours from 3:00 to 6:00 p.m. Arrangements are made through the Base Camp Office.
**BUILDING USE**

Our lounge is known as the “School Lounge” and is available for use by all parent partners. On occasion, committees or other groups may reserve the room for meetings. This is done through the school administrator. The candy and soda machines in the Lounge are not intended for use by students, but are available to parents. The supplies in the lounge are purchased by the teachers and staff with their own funds and are not for general use. Poudre School District buildings are available for rent to the public on a space available basis. Reservations and payment arrangements are made through the District Office. (See Page 30)

**COVENANT**

A covenant is an agreement between members of a community to act together in harmony in accordance with a common ideal. Since its founding, TCKS has had such an agreement tacitly, and in 1998, the school community wrote, voted on, and approved a written covenant. The TCKS Covenant describes our common vision, mission, and beliefs. The Covenant describes the education we want our children to have and why we want them to have it. The Covenant is essential reading for all parents and is in this binder.

**EMERGENCY PROCEDURES**

Poudre School District has five emergency classroom procedures. They are practiced as required.
1. Evacuation/Fire Alarm.
2. Lockdown. Students remain in the building and it is locked down completely.
3. Medical Emergency.
5. Emergency Evacuation—this is used if a staff member feels there is a threat to the class. They take the students and find cover.

**FOR MORE INFORMATION**

The full text of school policies and procedures; each of our Governing Documents, including the Covenant, Charter, and Original Proposal; and much more are available in their entirety on the TCKS website located at: www.psdschools.org/schools/traut and in the Parents’ Resources section of the TCKS library.

**HEALTH ISSUES**

District policy requires that a Parents’ Request for Giving Medicine at School Release and Indemnification Agreement be on file and signed by both a parent and a doctor before medication can be given to a student. These forms are available in the health office. An individual plan will be established for each child. Medication of any kind, including over-the-counter medications such as cough drops, vitamins, or Tylenol, may not be sent to school without a signed Parents’ Request for Giving Medicine at School Release and Indemnification Agreement on file. No stock medication is kept in the Health Office.

If a child is too sick to participate in classroom activities, he or she will be sent to the Health Office and a parent will be contacted to pick up the child. Minor injuries or illnesses will be evaluated and treated as needed. The health office is staffed daily from 8:00 a.m. – 3:00 p.m. by a health technician. The technician is available only for injuries and illnesses that occur during the school day. A Registered Nurse is on-site one-half day per week to identify, address, and monitor individual student health care concerns and is available by phone during the school day.

When should I keep my child at home?

A good test is the following: “Would you want your healthy child in the classroom with this child all day?” If the answer is “no,” please keep your child at home. If your child is running a fever, keep her or him home even if the fever has been reduced with medication. If you suspect that your child may be contagious, he or she should remain at home until the danger of contagion has passed.

The State of Colorado requires that our school maintain a file on each child, including updated immunization records. Your child must have a properly completed Colorado Department of Public Health and Environment Certificate of Immunization on file with the school. Medical, religious, and personal exemptions waiving Colorado immunization requirements for school attendance are possible. Details are available in the Health Office.

**PLAYGROUND & RECESS POLICIES**

The playground at TCKS is supervised by both a paraprofessional and teachers, maintaining a staff to child ratio of 1 to 75. Kindness and Respect are two Character Qualities that are especially emphasized daily on our playground. Parents are always welcome to spend time on the playground with
their child. If you need to remove your child from the playground for any reason you must inform the supervisor on duty before you leave the area.

Outside recess will be cancelled only if the temperature at the school is under 15 degrees Fahrenheit, if thunder and lightning are observed, or in the case of heavy rain or dangerously high winds. Therefore, it is extremely important that children are appropriately dressed for the weather.

SCHOOL OF CHOICE

At the present, there are 25 students per class for 1st - 5th grade with each grade having three classrooms. There are two half-day and two full-day Kindergarten classrooms. This is 75 students per grade or 450 students, K-5.

TCKS is a school of choice within the district, which is largely self-governing through the Site Based Management Committee. In theory, all schools in the PSD operate under a site based management policy, but at TCKS we fulfill the promise of site-based management by truly making most of the decisions regarding the school ourselves. TCKS operates as an integral part of the Poudre School District, gaining the benefits of the District’s expertise, management, and resources. The District also benefits from the ideas and concepts developed at TCKS. At the same time, the direction of our children’s education is decided locally at the school. We believe that we have the best features of a traditional school and a charter school and that our school is a model for the future.

TCKS is not a charter school although we have some similarities with charter schools. Like TCKS, charter schools are public schools, are often founded by parents, and parents are often responsible for a large share of the school governance and policy-making. However, there are significant differences between TCKS and a charter school. A charter school operates independently of the school district, controlled only by the terms of a written charter (contract) between the charter school and the district. The relationship between the district and the charter is only pursuant to the terms of the charter. Charter schools are also responsible for obtaining and paying for their own buildings.

STUDENT PLACEMENT IN CLASSROOMS

During the month of May, the sending and receiving teachers will meet to discuss the best classroom placement for each student. Decisions on student placement will be made in such a way as to best meet each student’s needs while at the same time creating balanced and diversified classrooms.

Parents are welcome to request in writing the classroom environment in which they think their child would do best. Parental Request for a Specific Learning Environment forms are available on the TCKS website and in the Policy Manual available in the Parents’ Resources section of the TCKS library. The deadline for submitting these requests is April 30.

On the first working day in August, class lists will be posted outside the TCKS office. During the month of August, teachers will welcome their new students via card or letter. If a change in this assignment is necessary after the initial posting, but prior to the first day of school, you will be contacted directly.

Transfers from one classroom to another during the school year are considered in accordance with the policy for Within Grade Level Classroom Transfer available on the TCKS website and in the Policy Manual available in the Parents’ Resources section of the TCKS library.

TARDINESS & ABSENCES

The school day starts at 8:25 a.m. (12:15 p.m. for afternoon kindergarten). On time arrival at school is very important. Children who are tardy miss the teacher’s opening instructions at the beginning of the day. This can result in a poor start to the day because the child does not have full information on what the class is doing.

Students who are not in the classroom by 8:30 a.m. are considered tardy (12:20 p.m. for afternoon kindergarten). Children arriving after this time must check in at the Main Office.

When situations arise that cause students to arrive at school after 8:30, the driver (parent or carpool) has the responsibility of letting attendance clerk know the circumstances causing the late arrival.

If a child is absent, the parents must call the absence line. In cases where parents know ahead of time that their child will be late getting to school, they must also call the absence line to let the office know. The teachers will then be notified of the absence or late arrival.
After six absences, a teacher will contact parents, document reasons given for student absences, and notify the Principal. Excessive absences will affect a child’s classroom performance and may ultimately lead to further action by the school principal or PSD Truancy officer.

For more information see the Tardy Policy available at the TCKS website and in the Policy Manual available in the Parents’ Resources section of the TCKS library.

TECHNOLOGY & MEDIA

With a Media Specialist present, students at TCKS may use the computer laboratory after school. Students and parents may use or check out books for approximately one-half hour before and after regular school hours.

TRAFFIC AND PARKING

Before school:

Children may be dropped off at TCKS beginning at 8:10 a.m. Supervision is provided. As you enter the school property from the driveway furthest to the west, you may follow the left lane into the parking area, or follow the right lane and join the line for the Drop Off/Pick Up Lane directly in front of the school. Please do not block the parking lot entrance. If you choose to park your vehicle, walk your children to the school utilizing the crosswalks. For the safety of students and adults alike, double parking in the drive-thru lane or pausing in the parking lot lanes or designated handicapped spots to let students out of the vehicle is not allowed. Please do not park in the Drop Off/Pick Up Lane. If you need to come in to the school, please park your vehicle in the lot. An additional drop off/pick up spot is behind the school to the south along Harvest Park Lane.

After school:

Teachers will bring their classes to a designated spot after the bell rings. You may stop in the Drop Off/Pick Up lane while you wait for your child to be dismissed, but may not leave your vehicle unattended. If you need to come in to the school for any reason, you must park your vehicle in the lot. Timberwood Drive is a public street and parking is not allowed on either side in front of the school.

How can I avoid the traffic jam before and after school?

The line is small or non-existent prior to 8:15 a.m. The line also generally dissipates after a few minutes. If there is a long line, park in the lot, and you can stop and chat, read the paper, or safely make your cell phone calls from your parked car. You can save some gas and aggravation.

Despite the unavoidable traffic problems, we must show responsibility, cooperation and patience to safely get our children to school before 8:25 a.m. and picked up no later than 3:20 p.m.

For more information and further suggestions, please see the TCKS Traffic Guide included in this notebook.

Community Use of District Facilities

(Policy KF)

- District-owned property is available for use for community groups.
- It is governed by district policy (Community Use of District-Owned Property (KF & KF-R))

Please contact Customer Service at 490-3333 for information or visit the district website (www.psd.schools.org) and search for “Information About Use of District Property” to obtain the customer service website.

TCKS POLICIES

TCKS has adopted several specific policies and procedures, some of which are listed below. They are all available on the TCKS website:

- Student Leave of Absence
- Grading Policy
- Teacher Job-share Policy
- Track and Field
- Dress Code
Additional Handbook Items from PSD

1. **First day of school 2012-13**
   Many PSD schools will have staggered start dates in August. Watch for information from your child’s school with the start date for your child’s class. You can also find first day of school information by visiting the school’s website or by calling your child’s school in August. In addition, school start and end times are changing for some schools and classes. You can find the school start and end times posted on the PSD website at www.psdschools.org.

2. **Space Available and Alternative Transportation Applications available August 1**
   The application process for 2012-13 space available transportation and alternative transportation remains unchanged. Applications will be available on the PSD website and at the transportation office beginning August 1.

   Requests are processed on first-come, first-served basis and are based on the space available on existing bus routes. Parents are encouraged to apply as soon as applications are available.

   **Application process overview:**
   - Parents must reapply for space available and/or alternative transportation every year.
   - Applications will not be accepted until August 1.
   - Only current year, 2012-13, applications will be accepted.
   - The application review process begins October 3, and families will be notified as soon as a determination is made.
   - A separate form must be filled out for each student.
   - Parents are responsible for providing student transportation until they are notified by the PSD transportation department that there is a seat available for them on a bus.

   Parents should be aware that transportation cannot assign students over the PSD Transportation capacity limits. Limits are based on age group of the students and size of the bus.

   Applications will be available on the PSD website August 1 at www.psdschools.org. For more information, contact the transportation routing department at 490-3155.

3. **Student Rights and Code of Conduct distributed electronically**
   The *Student Rights and Code of Conduct* will be distributed electronically for the 2012-13 school year. Families will have access to the *Student Rights and Code of Conduct* via the PSD website, through the *Connect* parent e-newsletter, and a limited number will be available in print at each school and at the district office for families that are not able to access it electronically. PSD implemented this change in 2010-11 to save paper, printing costs, and staff time. Watch for more details on the *Student Rights and Code of Conduct* during August registration.

4. **PSD continues to offer computer access at Walmart**
   You can access PSD information at a computer in the Walmart SuperCenter, 1250 E. Magnolia, Fort Collins. The PSD computer, which is available during regular Walmart business hours, gives you access to the PSD website that includes the latest district news and events, as well as information about school registration, bussing, calendars and district policies. You also have access to specific information about your child through the Parent landing page on the PSD website.

   Please know that this computer does not have access to outside email or Internet sites beyond the PSD website. PSD thanks the Walmart SuperCenter for partnering with the district on this project.
5. **To idle or not to idle?**
PSD has a district-wide ‘no idling’ policy for all district vehicles including buses during drop off and pick up times. Please do your part and help protect our children and environment by turning off your car engine when dropping off and picking your children up from school.

According to the American Lung Association, high concentrations of carbon monoxide occur in areas with heavy traffic congestion, such as school drop off and pick up. Carbon monoxide pollution can be especially harmful to children.

Please turn off your car engine; it’s good for the air our children breathe, it’s good for the environment and it helps save you money at the pump.

6. **Sex offender registry information available**
State law (C.R.S. § 22-1-124) requires that all schools notify parents about how to access records on registered sex offenders. Following are ways to obtain information about registered offenders:

- **List of offenders living inside city limits is available at City of Fort Collins Police Services:** Information about sex offenders via Colorado Bureau of Investigations statewide sex offender list is available at [http://sor.state.co.us/](http://sor.state.co.us/) which will take you to the State of Colorado registry. Simply follow the steps and select the city or county of interest for the information which is maintained by CBI. The local Fort Collins sex offender registration list can also be accessed by going to the police station at 2221 Timberline Road, and filling out a request form (no charge to view list; $7.50 to purchase copy).

- **List of offenders living outside city limits in Larimer County is available from Larimer County Sheriff:** Residents can go to the Sheriff’s Office administration building, 2501 Midpoint Drive, and view books with information and pictures of sex offenders at no charge. Residents can purchase a list for a fee of $7.50 through the records department. A database is online at: [http://www.larimer.org/sheriff/sexoffenders/index.htm](http://www.larimer.org/sheriff/sexoffenders/index.htm)

- **Colorado sex offenders registry from the Colorado Bureau of Investigation:** available online at [http://sor.state.co.us](http://sor.state.co.us)

7. **In case of an emergency…**
During an emergency situation, PSD will communicate information and instructions directly with parents through one or more of the following (see below to learn how to sign up for the various communication tools):

- PSD website www.psdschools.org
- Automated phone message delivered to emergency contact number
- E-mail to all parents (sign up at [www.psdschools.org](http://www.psdschools.org))
- Local radio and T.V. stations
- PSD Channel 10 (Comcast and US Cable)
- Parents may call the PSD Customer Service Center at 970-490-3333. Operators will have the most accurate and up-to-date information.

**It is vital for parents to keep their emergency contact information current with their school.**

**If an emergency does occur, please DO NOT:**
- Call your child’s school. School personnel will be occupied with taking care of students and will most likely not be able to answer the phone. Call the PSD Customer Service Center at 970-490-3333. Operators will have the most accurate and up-to-date information.
• Go to your child’s school. Parents arriving at the school will cause unnecessary congestion and hinder school personnel from taking care of students. Parents will receive information and instructions on how to pick their children up via the methods listed above.

8. District Communication with Parents

**Overview:** Poudre School District uses many tools to proactively communicate with parents. Below is a brief description of each tool, how to sign up or access it and a contact for more information.

**Note:** Although you may give your child’s school an email address in the student information packet at the beginning of the year, you must sign up separately on the E-mail Alert Sign Up (to receive school and/or district emails) and again on the Volunteer Email list (for emails about volunteer opportunities). More information about these email lists is below.

**PSD Website (www.psdschools.org):** For the latest and most accurate information about PSD, visit the PSD website. The PSD home page features current news, weekly school features, major district initiatives, curriculum information, district calendar items and videos. In addition, information about other resources like transportation, school safety, school lunches and more is easy to access. The website features a “Parent” landing page (located on the upper tool bar of the PSD home page) that includes a Student Snapshot feature that lets parents view personalized information about their child.

*Information: Deb Hooker, PSD Communications Specialist, dhooker@psdschools.org or 490-3549.*

**Emergency Communication:** PSD uses many methods to communicate with parents in emergencies such as a school closure due to weather. In these situations, parents can expect PSD Communications to share timely, accurate information via the district website front page, SchoolMessenger phone messages, parent email, staff email, and through media outlets.

Please make sure PSD has your correct email (see E-mail Alert Sign-Up below) and phone numbers (see SchoolMessenger Automated Phone System below). Also, familiarize yourself with the 3 weather closure processes below or visit: **www.psdschools.org/department/communications.**

*Information: Danielle Clark, PSD Communications Services 490-3427.*

**E-mail Alert Sign-Up:** By signing up to receive PSD and school email, you will receive critical emergency information, the monthly community e-newsletter and important information about district initiatives and current news. You will receive e-news about parent/teacher conferences, calendar changes and other important updates from your child’s school.

To sign up, visit the E-mail Alert Sign-up link located on slide show on the PSD home page and enter your address and school(s). **Although you may give your child’s school an email address in the student information packet, you must sign up separately on the E-mail Alert Sign-up to receive PSD emails.**

*Information: Deb Hooker, PSD Communications Specialist, dhooker@psdschools.org or 490-3549.*

**SchoolMessenger Automated Phone System:** PSD uses SchoolMessenger to call parents district-wide or parents at a specific school with emergency information or important upcoming events and opportunities. Parents can list **2 numbers (home and secondary number) for**
**EACH household** (not per parent).

**School calls:** Secondary school student absence calls go to both phone numbers daily from middle schools and high schools. **Elementary schools** call parents **personally** about attendance/absence issues at the beginning of the day. Other non-emergency phone calls a school makes go ONLY to the first number listed for the household.

**Emergency calls:** Only the district can make emergency calls. It calls **BOTH** those phone numbers for each household.

**How parents update their phone numbers, or add the second number:** Parents need to contact the school to update or add their home phone and a second phone number. Having 2 phone numbers on file ensures PSD and/or schools can reach parents in an emergency. These phone numbers are updated DAILY into the calling system.

**Texting:** Although PSD is not yet able to text, PSD is in process of collecting those numbers. Parents may add their number for texting on the Email Alert Sign Up.  
**Information:** Amy Agnew, PSD Information Technology, amy@psdschools.org or 490-3404.

**Pinnacle Internet Viewer (PIV):** Parents and students can see daily grades, assignments and test scores. Teachers enter grades into their electronic grade book and PIV organizes the data for convenient 24/7 viewing. PIV is located as a left-hand link on the “Parent” landing page. Parents must know their student’s identification number and PIN code to access it. Please contact your child’s school if you have questions about PIV.

**Student Snapshot:** The Student Snapshot (formerly called the Parent Portal) offers parents a personalized look at their student’s information, including a link to their student’s academic growth information, PIV (Pinnacle Internet Grade Viewer) and fees (ie: lunch credits, athletic fees, etc…). Parents can now pay lunch fees online. We hope to make other fees payable online soon.

The Student Snapshot can be accessed by clicking on the Student Snapshot button located on the “Parent” landing page. Parents must set up an account by clicking on the account link, located in the upper left of the login page. A unique activation code is required for each student a parent wishes to access. Activation codes are set up at your child’s school and given to parents. Activation codes can also be generated in the Student Snapshot and emailed to the head of household (who is currently listed on the PSD student information database).  
**Information:** 490-3020 or portalhelp@psdschools.org

**Blackboard:** Teachers can use the Blackboard online classroom system to post lessons, homework assignments, announcements and other information for students to access. Blackboard is located as a left-hand link on the “Students” landing page on the upper tool bar of the PSD website. Students are assigned Blackboard usernames and passwords, which parents must also use in order to view it.  
**Information:** Ben Johnson, PSD Instructional Technology, benj@psdschools.org or 490-3436.

**Volunteer Email List:** By signing up on the volunteer email list, you will receive notices about volunteer opportunities at schools and in the district. To be on this email list, you must be a registered/cleared volunteer. To register, visit the Partnerships and Volunteers web page (www.psdschools.org/partnerships) on the PSD website and click the blue Register button under “Individual Parent/Community Volunteer.” Once you’re registered (enter a valid email
address!) and have cleared the background check, you will receive emails from the school you have signed up for and/or weekly emails about district volunteer opportunities. Information: Cyndi Gile, PSD volunteer coordinator, cynthiag@psdschools.org or 490 3208.

9. PSD Weather-Related Plan for Schools*
Should the need arise due to inclement weather and/or questionable road conditions, PSD may implement a delayed start of all schools by 2 hours. The following is important information for parents regarding notification of delayed start, as well as a refresher on school closure and early release plans.

1. Delayed Start of Schools Due to Weather, Road Conditions

Should the need a rise, the delayed school start time will be 2 hours, for all schools.

- **Delayed start decision:** A decision about delayed start will be made by 5:30 a.m.
- **Parent notification:** Visit the PSD website at www.psdschools.org or tune in to local radio or television stations to find out about delayed start the morning of the day in question. Please do not call schools, district offices, or broadcast media. No announcements by media and on the website means all schools are open as usual.
- **Bus pick up times:** Buses will pick up students at bus stops 2 hours later than regularly scheduled pick-up times. Buses will make every effort to be punctual, although traffic and road conditions may increase travel time. Please ensure your child is dressed warmly in anticipation of a potentially longer wait time. Parents are encouraged to walk their children to bus stops and avoid walking along the roadways. Sidewalks are safer even if these areas are not cleared of snow.
- **Drop off and arrival times:** Parents dropping off students, students who walk, and students driving to school should arrive 2 hours after their regular arrival times. Please do not arrive earlier.
- **Kindergarten and Early Childhood programs:** Morning-only kindergarten programs and morning Early Childhood programs are cancelled when there is a delayed start schedule. Afternoon kindergarten and afternoon Early Childhood programs will run on normal schedules. Full-day kindergarten and full-day Early Childhood programs will start 2 hours later than normal.
- **Before- and after-school childcare:** B.A.S.E. (Before and After School Enrichment) Camp will open as normally scheduled for students attending these programs. If your childcare provider is other than B.A.S.E. Camp, contact them for start times.
- **School dismissal times:** School dismissal times will remain on regular schedules, including bus drop-off times in neighborhoods and parent pick-up times at schools.

2. School Closures Due to Weather, Road Conditions

If schools are closed due to inclement weather and/or questionable road conditions, parents should visit PSD’s website at www.psdschools.org for information about school closures or tune in to local radio and television stations the morning of the day in question.

**Media outlets are informed if schools are closed.** No announcements on the PSD website or by the media means all schools are open as usual.
A decision about weather-related school closures is made by 5:30 a.m., and media outlets are notified immediately. Parents should NOT call schools, district offices, or broadcast media.

The PSD website (www.psdschools.org) and the following radio and television stations will provide information about PSD school closures. We will notify Spanish radio stations KGRE 1450 AM and KJJD 1170 AM for Spanish speaking families.

Note: When PSD schools are closed, B.A.S.E. (Before and After School Enrichment) Camp will be closed.

Television Stations (Comcast Cable channels are listed below; channels vary by provider):
Channel 2, CW2 Colorado/KWGN-TV
Channel 4, CBS4 Denver
Channel 5, CBS 5 (Northern Colorado)
Channel 7, 7News KMGH
Channel 9, 9News KUSA
Channel 10, PSD public access TV (available on Comcast and U.S. Cable)
Channel 13, Fox 31

Radio Stations:
KCOL 600 AM  KKQZ 94.3 FM  KRFC 88.9 FM
KCSU 90.5 FM  KOA 850 AM  KISS 96.1 FM
KFKA 1310 AM  KOOL 105 FM  KUAD/K99 99 FM
KGRE 1450 AM  KPAW 107.9  KUNC 91.5 FM
KJJD 1170 AM  FM  TRI 102 102.5 FM
KVUU 99.9 FM  KIIIX 1410 AM

Other Media:
Fort Collins Coloradoan: www.coloradoan.com
Northern Colorado Tribune at www.greeleytribune.com

3. Early Release of Schools Due to Weather, Road Conditions

If the weather forecast suddenly changes to adverse conditions, PSD may put in to action an early release. Parents are urged to develop a plan for your student’s early release to your home. B.A.S.E. (Before and After School Enrichment) Camp will not be available after school if schools release students early.

When PSD makes a decision to close schools earlier than the regularly-scheduled release times due to inclement weather and/or questionable road conditions, parents will be notified by phone. In addition, the PSD website (www.psdschools.org) and media outlets (listed above) will communicate early release information. Parents are urged to make sure family contacts and telephone numbers are current at your child’s school for such an emergency.

*Each time there is a concerning accumulation of snow or a fear that the roads will be impassable, PSD transportation team members perform roadway checks throughout the
district. Each person on this team is assigned to cover areas east of I-25, Wellington, Fort
Collins, Rist Canyon, Red Feather and Highway 287 (to the Wyoming border). Each member
of the team drives 130 to 160 miles when checking road conditions.

Members consider travel safety for busses and school staff when checking road conditions. It
is the individual decision of parents to determine whether they feel their high school aged
student(s) are capable of driving in these conditions. Parents may choose to explore other
options, like finding alternative transportation, if they do not want their child driving to school.
Parents have the option to keep their child at home if they do not feel it is safe for their child to
walk or ride to school due to weather and/or road conditions.

For additional information about the policy and procedures, contact the transportation
department at 490-3155.

UPDATES
This Handbook will be updated periodically.
This version of the handbook was updated in September, 2012.
